Back End: ADO.NET, SQL, SQL Server

Tools: Azure Data Studio, Visual Studio, Visual Studio Code, SSMS, Git Bash, Adobe Illustrator, Stripe

Professional Skills: Troubleshooting, Critical Thinking, Communication, Project Management Fundamentals, Teamwork, Pair Programming, Entrepreneurial, Creative, Hardworking, etc.

INDEPENDENT DEVELOPMENT PROJECTS

- **Personal Site:** AustinFarrow.com – used HTML5, CSS3, Bootstrap, and a Bootstrap starter template to build a personal portfolio website. Many custom changes had to be made to give it the desired look that I wanted. It was an enjoyable and rewarding project. I plan on definitely continuing to update this website with new projects and changes overtime.
 - **StoreFront:** Created a secure application for managing product data. Application is built to simulate an online store front with a shopping cart. Administrators have the ability to manage product, category and vendor data.
 - **S.A.T. Scheduling Administration Tool:** Created a secure application for managing product data. Application is built to simulate an online class scheduling system. Administrators will have the ability to manage students, courses, scheduled classes, and enrollments.
-

TECHNICAL TRAINING

Full Stack Coding Program, Centriq
Kansas City, Missouri

Anticipated Graduation 05/2024

- .NET Core MVC Framework
- Troubleshooting & Debugging
- Source Control
- Agile/Scrum (Created Team Project)
- Website Deployment
- Pair Programming
- Code Review

WORK EXPERIENCE

Graphic Designer, AlphaGraphics
Belton, Missouri

08/2022 – 01/2024

- Built eye-catching flyers, postcards, banners, and more using specific methods and software ensuring the best print quality, so we could be sure customers would continue coming back.
- Created and revised proofs according to customers feedback, ensuring accuracy and satisfaction, thereby fostering long-term customer relationships and repeat business.
- Facilitated clear and effective communication among team members and departments to streamline the order process from graphics and printing to customer pickup.
- Constructed a large portion of our online e-commerce website (done with uStore and XMPie) which was built so customers can order various common products online without needing to call or email, therefor automating a portion of the order input process making it easier for employees to put in orders and minimize errors.
